Professional Summary

Software Engineer (SDE-1) with experience building scalable fintech and full-stack applications. Strong in backend development, REST APIs, performance optimization, and modern web frameworks.

Professional Experience

Opas Bizz Private Limited

Apr 2025 – Present

Software Engineer (SDE-1)

Noida, Uttar Pradesh

- Built and scaled core **fintech platform modules** including **transaction dashboards**, payment workflows, and financial reporting systems using **React, Node.js, Express.js, Redis**, and **MongoDB**.
- Designed and implemented **RESTful APIs** for **payment processing** and **transaction management**, including secure **authentication** and **role-based authorization** workflows, ensuring compliance-ready data handling and improved **system scalability**.
- Optimized **financial data query performance** through **Redis** caching and database indexing on high-volume transaction records, achieving 30% faster query response times.
- Developed **responsive, reusable** frontend components for **account statements, payment history**, and real-time balance **synchronization**, resulting in a 25% increase in **user engagement** and a 15% **improvement** in **customer satisfaction**.
- Implemented **secure single active session management** with automatic **token invalidation** on suspicious concurrent login attempts, reducing **unauthorized account access** risks and strengthening overall **financial data security**.

GeeksforGeeks

Dec 2024 – Apr 2025

MERN Intern

Noida, Uttar Pradesh

- Developed full-stack applications using MongoDB, Express.js, React.js, and Node.js across multiple production-grade projects.
- Implemented **JWT-based authentication, role-based route protection**, and session management, reducing unauthorized access incidents by 100%.
- Optimized frontend performance using React Hooks and **memoization** strategies, achieving 40% faster load times and 35% reduction in code redundancy.
- Participated in peer code reviews, enforcing ES6+ standards and React best practices across the development team.

Technical Skills

Languages: Python, JavaScript, TypeScript

Web Frameworks & Libraries: React.js, HTML5, CSS3, Tailwind CSS

Backend Technologies: Node.js, Express.js, REST APIs, Redis, FastAPI, Authentication & Authorization

Databases: MongoDB, PostgreSQL, MySQL

Cloud: AWS (IAM, EC2, S3)

Tools & Platforms: Git, Vercel, Docker, Linux

Projects

SkillSwap – Peer Learning Platform

June 2025

Tech Stack: *React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Socket.IO, JWT, Bcrypt.js, Tailwind CSS*

- Engineered a full-stack MERN application connecting learners and educators with role-based access control for Students, Instructors, and Admins, supporting 3 distinct user flows.
- Architected a real-time chat system using **Socket.IO** with message persistence, booking-specific chat rooms, and authenticated WebSocket connections — **reducing messaging latency by 60%**.
- Secured authentication with **JWT, Bcrypt.js, and HTTP-only cookies**, implementing strict **RBAC policies** that eliminated unauthorized API endpoint access.
- Hardened backend security using Helmet, CORS, rate limiting, and Express-Validator middleware, achieving consistent input validation and error handling across all API routes.
- Managed global state using Redux Toolkit with createAsyncThunk for async auth flows, reducing prop-drilling and improving **component reusability by 45%**.

Certifications

MERN Full-Stack Developer Certification — GeeksforGeeks

Apr 2024

Deloitte Technology Job Simulation — Forage

Mar 2026

Education

Graphic Era Hill University

Aug 2022 – Jun 2024

Master of Computer Application

Dehradun, Uttarakhand

Arcade Business School

Aug 2019 – Jun 2022

Bachelor of Computer Application

Patna, Bihar
